PROFESSIONAL SUMMARY

Site Reliability Engineer with 6+ years of experience building and operating resilient, large-scale cloud platforms across GCP, AWS, and Azure. Deep practitioner of Kubernetes (GKE), GitOps (ArgoCD), and Infrastructure as Code (Terraform, Ansible), with a track record of sustaining 99.9%+ uptime SLAs and delivering \$300K+ in annualized cloud savings through data-driven optimization. Pioneered AI-driven operational models using MCP-based agentic workflows, cutting MTTR by 20% and alert fatigue by 15%, bridging the gap between traditional SRE and intelligent automation. Aspiring to architect the next generation of self-healing, AI-augmented infrastructure platforms that set the reliability and efficiency benchmark at a high-growth, engineering-first organization.

Impact Highlights: 99.9%+ sustained uptime | \$300K+ annualized cloud savings | 20% MTTR reduction via AI/MCP automation

TECHNICAL SKILLS

- **Cloud Platforms:** Google Cloud Platform (GCP), Amazon Web Services (AWS), Microsoft Azure
- **AI & Agentic Operations:** MCP (Model Context Protocol), AIOps, Agentic Automation, Prompt Engineering, Vertex AI, LLM-Assisted Incident Response
- **Containerization & Orchestration:** Kubernetes (GKE/EKS), Docker, Helm, Container Lifecycle
- **Infrastructure as Code (IaC) & GitOps:** Terraform, Ansible, ArgoCD, Chef
- **CI/CD & Automation:** Jenkins, GitHub Actions, Azure DevOps, Git
- **Monitoring, Observability & Incident Response:** Prometheus, Grafana, Dynatrace, New Relic, PagerDuty
- **Systems & Networking:** Linux (OS Internals, Performance Tuning), Nginx, TCP/IP, DNS, Load Balancing
- **Programming & Scripting:** Python, Bash/Shell Scripting, Golang (Go, Basic), JavaScript, Angular

PROFESSIONAL EXPERIENCE

- **BlackLine** Bengaluru, KA
Site Reliability Engineer June 2024 - Present
 - Served as **primary on-call and incident commander** on a bi-weekly rotation for tier-1 services; actively resolved major outages, conducted blameless RCAs, and led the strategic **onboarding of a NOC team** as an L1 first line of defense, training them on initial investigations to **drastically reduce engineering escalations**.
 - Built an **AI-powered New Relic MCP server** that audits alert coverage and dashboard gaps across microservices using **Golden Signals** (latency, traffic, errors, saturation), improving observability baseline quality and **reducing non-actionable alert noise by 15%**.
 - Designed and deployed an **On-Call Agent** integrating PagerDuty, New Relic, and automated runbooks to classify incidents, execute safe remediations, and escalate only complex or permission-sensitive cases with context-rich summaries, **reducing MTTR by 20%**.
 - Led foundational platform enablement for development teams by **provisioning greenfield GCP projects** end-to-end, including IAM guardrails, networking baselines, **CI/CD onboarding**, and **Vertex AI setup**, **reducing team onboarding time by 25%**.
 - Spearheaded a massive **cloud cost-optimization** initiative, involving instance right-sizing, storage tiering, and database upgrades, generating **over \$300,000 in annualized operational savings**.
 - Managed Kubernetes workloads utilizing **GitOps principles with ArgoCD and Helm**, streamlining deployment processes, enabling automated drift detection, and **reducing manual release intervention by 20%**.
 - Established an **agentic reliability engineering** operating model by combining observability intelligence, incident context enrichment, automated remediation, and toil reduction workflows, **reducing alert fatigue by 15%** and improving on-call efficiency.
- **Liferay** Bengaluru, KA
Associate Site Reliability Engineer Dec 2022 - June 2024
 - Administered and scaled **large-scale Google Kubernetes Engine (GKE) clusters**, ensuring optimal resource allocation, security compliance, and **fault tolerance for mission-critical portals**.
 - Conducted deep-dive **troubleshooting into Linux OS internals**, network stacks, and resource scheduling to optimize application performance and stability.
 - Elevated system observability by **instrumenting Prometheus, Grafana, and Dynatrace**, establishing proactive thresholds and alerts that **addressed performance degradation prior to customer impact**.

- **Restructured and maintained Jenkins CI/CD pipelines**, proactively identifying build-stage bottlenecks and troubleshooting faulty deployment mechanics to **stabilize daily release trains**.
 - Executed detailed GKE cluster performance analysis to identify compute inefficiencies; implemented node auto-provisioning and **proactive node-scale-down strategies** to **achieve a sustainable 20% footprint cost reduction**.
 - Wrote **custom Python and Bash automation scripts** to replace tedious daily operational tasks, **saving the infrastructure team 10+ hours per week**.
- **Capgemini** Mumbai, MH
Senior Software Engineer *June 2019 - August 2021*
- Provisioned, secured, and scaled **enterprise-grade AWS and Azure cloud infrastructures** leveraging VPCs, EC2/VMs, and auto-scaling groups for global client deployments.
 - Troubleshoot and resolved complex network and routing issues, including **Load Balancer algorithms, DNS resolution, and TCP/IP bottlenecks**, ensuring uncompromised connectivity and low latency.
 - Drove foundational Infrastructure as Code (IaC) adoption by developing version-controlled **ARM templates and Bash deployment scripts**, standardizing cloud environments and drastically **reducing manual provisioning errors**.
 - Engineered **Python and shell automation suites** to govern cloud resource lifecycles, automating snapshot cleanup, instance tracking, and IAM access audits, effectively **reducing weekly operational toil** across engineering teams.
 - Delivered **CI/CD pipelines via Azure DevOps** for multi-environment deployments, enforcing gated release stages and automated rollback triggers to **reduce failed deployments**.

KEY TECHNICAL PROJECTS

- **Engineering Intelligence Platform (Hackathon 2nd Place)**: Built a unified internal platform that centralizes multi-team documentation, service dependency mapping, and live service health into a single pane of glass; **reduced cross-team troubleshooting time by 35%** and improved incident handoff quality.
- **GCP Cost Intelligence Optimizer (Terraform, GKE, Python)**: Developed a cloud optimization tool that analyzes GCP node/workload utilization, identifies overprovisioned resources, and recommends rightsizing actions; **delivered over \$300,000 in annualized infrastructure savings** while preserving reliability SLAs.
- **MCP On-Call Automation Suite (TypeScript, Python, New Relic, PagerDuty)**: Engineered MCP-based operational tools for alert analysis, contextual troubleshooting, and runbook-driven remediation to **accelerate incident handling and improve escalation precision**.
- **Automated Storage Compliance Controller (Python & AWS S3)**: Developed a Python-based automation tool to proactively audit AWS S3 buckets across the organization. Enforced encryption standards, **configured intelligent lifecycle policies** for cost optimization, and ensured strict IAM access controls for data security.
- **GitOps Fleet Manager (ArgoCD, Helm & Kubernetes)**: Architected a centralized GitOps deployment workflow using ArgoCD and custom Helm charts to synchronize microservices across multiple Kubernetes clusters, providing **automated drift detection and rapid rollback capabilities**.
- **Active Open Source Contributor (Ansible, ArgoCD, Jenkins)**: Recently began exploring and contributing to major DevOps/SRE repositories. Focused on submitting introductory pull requests, investigating open issues, and providing minor bug fixes and configuration enhancements.

AWARDS

- **Star of the Month** | BlackLine (Recognized for outstanding contributions to AI-driven SRE automation and incident management)
- **Company-Wide Hackathon | 2nd Place** | Built an AI-enabled engineering intelligence platform for documentation discovery, dependency visibility, and real-time service health insights.
- **Best Performer Award** | Capgemini (Recognized as a top-performing junior developer for rapid upskilling, high project impact, and proactively achieving cloud certifications)

CERTIFICATIONS

- **HashiCorp Certified: Terraform Associate (003)** | HashiCorp
- **Google Certified Professional Cloud Architect** | Google Cloud
- **Microsoft Certified: DevOps Engineer Expert (AZ-400)** | Microsoft Azure
- **AWS Certified Solutions Architect Associate** | Amazon Web Services
- **AWS Certified Cloud Practitioner** | Amazon Web Services

EDUCATION

- **Reva Institute of Technology and Management**
Bachelor of Engineering

Bengaluru, KA
June 2018
